

Texas Holdem Cheat Sheet

The following chart is a Texas Holdem cheat sheet for quickly working out the odds of hitting your card after the flop assuming you know how many outs you have. If you are betting the flop, use the Drawing 2 Cards column as you have 2 cards left to come. If you are betting the river, use the Drawing 1 Card column because you only have the river left to hit.

Probabilities are given as a ratio of Losses : Wins. E.g. drawing to six outs on the flop is a ratio of 3:1, or in other words you will miss three times for every one time you win.

# of Outs	Equivalent To	Drawing 1 Card	Drawing 2 Cards
20		1.3:1	0.5:1
19		1.5:1	0.5:1
18		1.6:1	0.6:1
17		1.8:1	0.7:1
16		1.9:1	0.8:1
15	Flush draw with 2 over cards	2.1:1	0.8:1
14		2.4:1	1:1
13		2.6:1	1.1:1
12	Flush draw with 1 over card	3:1	1.2:1
11		3.3:1	1.4:1
10		3.7:1	1.6:1
9	Flush draw	4:1	1.9:1
8	Open ended straight draw	5:1	2.2:1
7		6:1	2.6:1
6	Two over cards	7:1	3:1
5		8:1	4:1
4	Gutshot straight draw	11:1	5:1
3		15:1	7:1
2	Trying to hit trips from pocket pair	23:1	11:1
1	Looking for a miracle	46:1	23:1
